**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 67-77, drawn to an adjuvant composition comprising GAP-DMORIE.

Group II, claim(s) 78-83, drawn to an immunogenic composition comprising an immunogen and an adjuvant composition comprising GAP-DMORIE.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of group II is a combination of a immunogen and an adjuvant, whereas the special technical feature of group I is simply an adjuvant. The special technical features of groups I and II are different because the immunogen provides antigenic determinants and epitopes which are capable of eliciting specific immune responses in a mammal, characterized in particular by antigen specific antibodies, and T cells. The adjuvant alone is not capable of this activity and can only at best stimulate non-specific immunity. As such the compositions of groups I and II are distinct in that they have different structural, chemical, and functional properties, and can be used for different purposes, i.e. the generation of non-specific versus specific immune responses.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
